**Task III. Read the article about New York and answer the questions below.**

**New York - The Big Apple**

Ex-mayor of New York, Ed Koch, called New York City "The Big Apple" in a speech, and the name stuck. The Big Apple is a symbol that captures the feeling of a city that is very big and very busy. For example, there are so many restaurants in New York that you could eat in a different one every day of your life. New Yorkers say, "Everything happens in New York...". There is truth behind this. By world standards the city is relatively young, and perhaps this is one reason for its liveliness.

New York was founded by the Dutch merchant sailors who settled there in the 16th century and called it New Amsterdam. Manhattan, the island between the Hudson and the East River which is now the city centre, was bought from the local native American tribe for 24 dollars.

The Dutch influence is still apparent in New York names like Harlem which was originally Haarlem (a Dutch city) and the Bronx from Broncks, a Dutch family name. In 1664, the Dutch were forced out by the British, who renamed the city New York.
